

Bubble Mania

Hi, I am Margaret Cross and over the last three years I have been getting very proficient at making large strong bubbles.

I consulted with the Amazing Bubble Man, Louis Pearl, and he advised me where to find the best bubble mixture recipe. All professionals agree that using guar gum gives the best bubbles.

The wand is similar to those made by Dr Zigs.

Bubble mix ingredients

100g Fairy liquid

½ heaped tsp guar gum

1 heaped tsp bicarb of soda

2 litres warm water

Mix Fairy liquid and powders until smooth. Add water slowly.

Store in a plastic container for 24 hours before use.

It lasts a few weeks.

Please note:

Making about 8 litres of solution gives you enough for the big wands.

Guar gum can be bought online from Amazon and eBay.

To make the wand

Round wooden dowel, 2 pieces about 60 cm long

Cotton rope or cord, a little thinner than sash cording. (I use Everlasto banding no 6)

Short length of plastic tubing, wide enough to slip over the dowel and rope snugly.

A weight for the longer length of rope.

Plastic pipettes are available on eBay.
