

Science with a Washing Line

Hello, my name is TimO and I'm an engineer by training.

In my spare time I volunteer with the IoP doing outreach activities such as this.

Health and safety: Please take sensible precautions (avoid trip and falling hazards or walking into the line) if you try out anything you see here today (and get the washing-line owner's permissions first!)

If you are thinking of trying these experiments yourself, you will need:

- string;
- drinks bottles;
- juice carton;
- balloon;
- drinking straw;
- bunch of keys;
- paperclips;
- sticky tape;
- scissors;
- sharp pencil;
- a washing line;
- clothes pegs;
